

# Approved Disinfecting Wipes for use on Select HP Platforms

Tested up to 10,000 Wipes

**This guide contains a list of germicidal wipes that have been approved to use up to 10,000 times on select models of the following platforms:**

HP EliteBooks  
HP ZBook Mobile Workstations  
HP Mobile Thin Clients  
HP Engage

## HP Has Tested Several Brands Of Germicidal Wipes Commonly Used In Clinical Settings

The following HP products listed in this document have been tested to withstand extensive disinfecting using germicidal wipes commonly found in clinical settings. As new global diseases begin to emerge, clinical settings are drastically impacted. The Centers for Disease Control and Prevention (CDC) recommends frequent and inherent cleaning and disinfecting of all touched surfaces, including durable electronic devices, as a best practice to reduce the transmission of pathogenic bacteria, viral pathogens, and other viral respiratory illnesses in hospitals, ambulatory vehicles, long-term care facilities and other clinical settings.<sup>1</sup>

In order to assist customers in the prevention of spreading transmittable diseases, HP has performed extensive tests on select HP product lines up to 10,000 times over a 3-year period.

For detailed instructions on how to properly clean your HP device using the approved disinfecting wipes, we recommend visiting our guide on [How to Clean Your HP Device with Approved Disinfecting Wipes](#).<sup>2</sup>

## HP Elitebooks and Mobile Workstations Products Tested:

- HP Elitebook 830/840/850 G7 and G8
- HP Elitebook 835/845/855 G7 and G8
- HP Zbook Firefly 14/15 G7 and G8
- HP Zbook Create G7 and G8
- HP Zbook Studio G7 and G8
- HP mt46 Mobile Thin Client

## Germicidal Wipes Approved for Use:

### Cleanisept® Wipes

Per 100g solution: 0.25 g Didecyldimethylammoniumchloride, 0.5 g Alkylbenzyltrimethylammoniumchloride

### Sani-Cloth® AF3 Germicidal Disposable Wipe

(EPA Reg. No. 9480-9; Quaternary ammonium compounds, C12-18-alkyl [(ethylphenyl) methyl] dimethyl, chlorides: <0.5%; Benzyl-C12-18-alkyldimethyl ammonium chlorides: <0.5%

### Sani-Cloth® Plus Germicidal Disposable Cloth

(EPA Reg. No. 9480-6); Isopropranol: 10-20%; 2-Butoxyethanol: <5%; Quaternary ammonium compounds, C12-18-alkyl [(ethylphenyl) methyl] dimethyl, chlorides: <0.5%; Benzyl-C12-18-alkyldimethyl ammonium chlorides <0.5%

### Cleaniswept® Wipes Forte

Per 100g solution: 0.2 g didecyldimethyl ammonium chloride, 0.4 g Alkyl (C12-16) dimethylbenzyl ammoniumchloride

### Schulke Microzid® Sensitive Wipes

Per 100g solution: 0.26g Alkyl(C12-C16) dimethylbenzyl ammonium chloride (ADBAC/BKC (C12-C16)); 0.26g Didecyldimethylammonium chloride (DDAC); 0.26 g Alkyl(C12-C14) ethylbenzylammonium chloride

### Sani-Cloth® HB Germicidal Wipe

(EPA Reg. No. 61178-4-9480) Benzyl-C12-18-alkyldimethyl ammonium chlorides: 0.07; Quaternary ammonium compounds, C12-14-alkyl[(ethylphenyl) methyl, dimethyl, chlorides: 0.07%

## HP Engage Systems

The table below represents the select HP Engage products that were tested up to 10,000 times against several branded germicidal wipes. The table shows which products successfully passed the test with the corresponding disinfecting wipe.
